Cylindrical Optics: Extraordinary sizes for biotechnology application

BERLINER GLAS Group manufactures precision cylindrical optics in extraordinary sizes and surface quality which are mainly used in bio-medicine, analytical and research applications.

The optics will be offered as concave or convex or achromatic lenses, rods, tubes or cones.

All optical materials such as quartz, CaF_2 , MgF_2 , optical glass, glass ceramics, borosilicate glass and filter glass are used with low fluorescence for bio-medical use. BERLINER GLAS offers length up to 500 mm standard, larger sizes available on request with radii from 3-50000 mm.

All parts can be coated according to customer's requirements, different outlines can be shaped.
