

## PRESS RELEASE

2006-26/10

### Vibrant color glass VarioTrans® for architectural application

Prinz Optics GmbH, a Berliner Glas Company, offers dichroic, vibrant color glass which is qualified as an excellent construction material due to its high translucence, high temperature durability and the color options. Triple-laminated glass is extremely stable and can meet all structural regulations.

Creative accents can be utilized with coated multicolor glass for architecture, design, interiors or art by Prinz Optics GmbH. For better cleaning and protection against environmental damage in outdoor application, we recommend triple glass with a minimum 3 mm thickness front panel for outdoor applications. The glass components will be offered customized, with or without frames depending on your needs.

Sizes: standard 1080 x 800 mm and maximum 1400 x 1000 mm as laminated safety glass

– maximum dichroic joined connection glass (e.g. as mosaic) 5800 x 2550 mm. Joined connection can combine different colors and color gradients in one plate or also semi-permeable mirrors and/or clear glass. The use of color-clear glass guarantees true colors in its extraordinary characteristics with high-level natural brilliance.

For interior or artistic construction, double or single glass can be used. The coated glass is characterized by its high stability and practical value, durability and simplified processing.

#### **About Prinz Optics:**

Prinz Optics GmbH is a leading manufacturer of coatings using the sol-gel dip process. Since July 2005, Prinz Optics has belonged to the BERLINER GLAS GROUP, with more than 800 employees in Germany, Switzerland and the USA.
