Flabeg Technical Glass US Corporation and Berliner Glas US Inc. announce north American manufacturing and sales agreement

We are pleased to announce that Flabeg Technical Glass US Corporation and Berliner Glas US Inc. have entered into a manufacturing and sales agreement to improve their efficiency and competitiveness and more rapidly grow their businesses serving the technical glass markets in the United States, Canada and Mexico.

This arrangement provides Berliner Glas with full access to Flabeg's technical glass manufacturing capability for its own products, and access to Flabeg's product line to allow it to expand sales opportunities in the United States. At the same time, Berliner Glas will serve as Flabeg's sales agent for Flabeg's technical glass products manufactured worldwide focused in the markets for Display Glass (Mobile & Monitor), Specialized Lighting and Industrial Glass for Devices.

We believe this positions both Flabeg and Berliner Glas better than ever to deliver our North American customers the highest quality, most cost competitive products available anywhere among technical glass producers.

Flabeg, founded in 1882, is headquartered in Nuernberg, Germany and has a global production footprint with 10 manufacturing facilities across Europe, the Americas and in Asia. In addition to its technical glass capability, Flabeg is a manufacturer of parabolic mirrors used in large-scale Concentrated Solar Power (CSP) plants for the generation of electricity. As a tier 2 supplier for the global automotive industries, Flabeg produces mirror glass for exterior as well as interior applications for passenger cars and commercial vehicles.

Berliner Glas, founded in 1952, is headquartered in Berlin, Germany. The company is one of the leading manufacturers in Europe of precise optical components, assemblies, systems and highly refined technical glass. Berliner Glas supports its customers with a complete manufacturing range in one-stop from development to mass production of integrated assemblies.
